

Peabody Beardsley Maritime Chapter

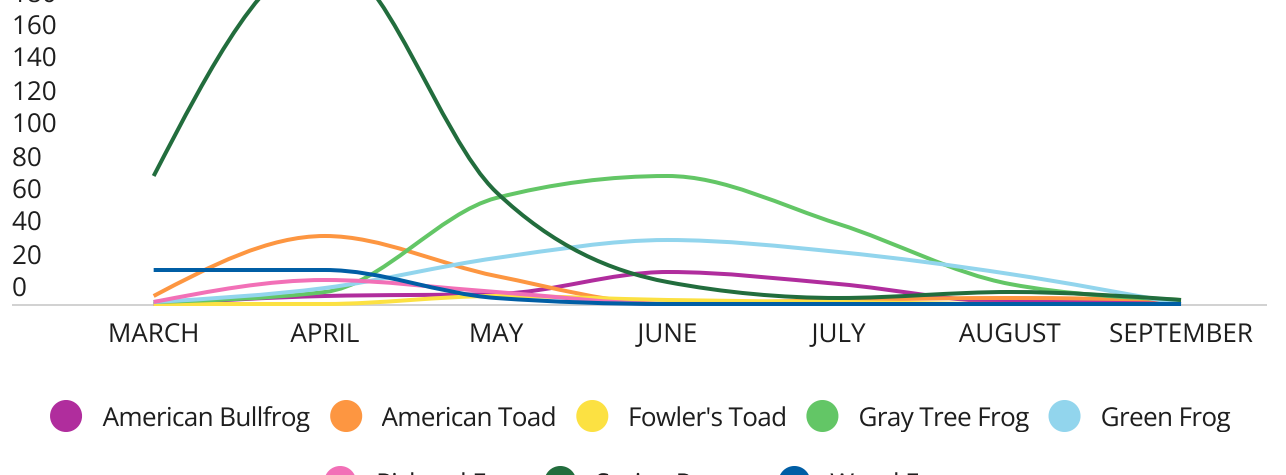

Another amazing season in the books! We can't begin to thank you enough for all of your hard work and dedication to the program. A new study shows some pretty grim news for amphibian populations (see frogs in the news below), so now more than ever this work is vital. We hope you've enjoyed being part of the program and we hope you'll continue next season.

With extreme gratitude,
Andrew, Bridget, Jen, and Jim

2023 Summary

2023 Total Observations

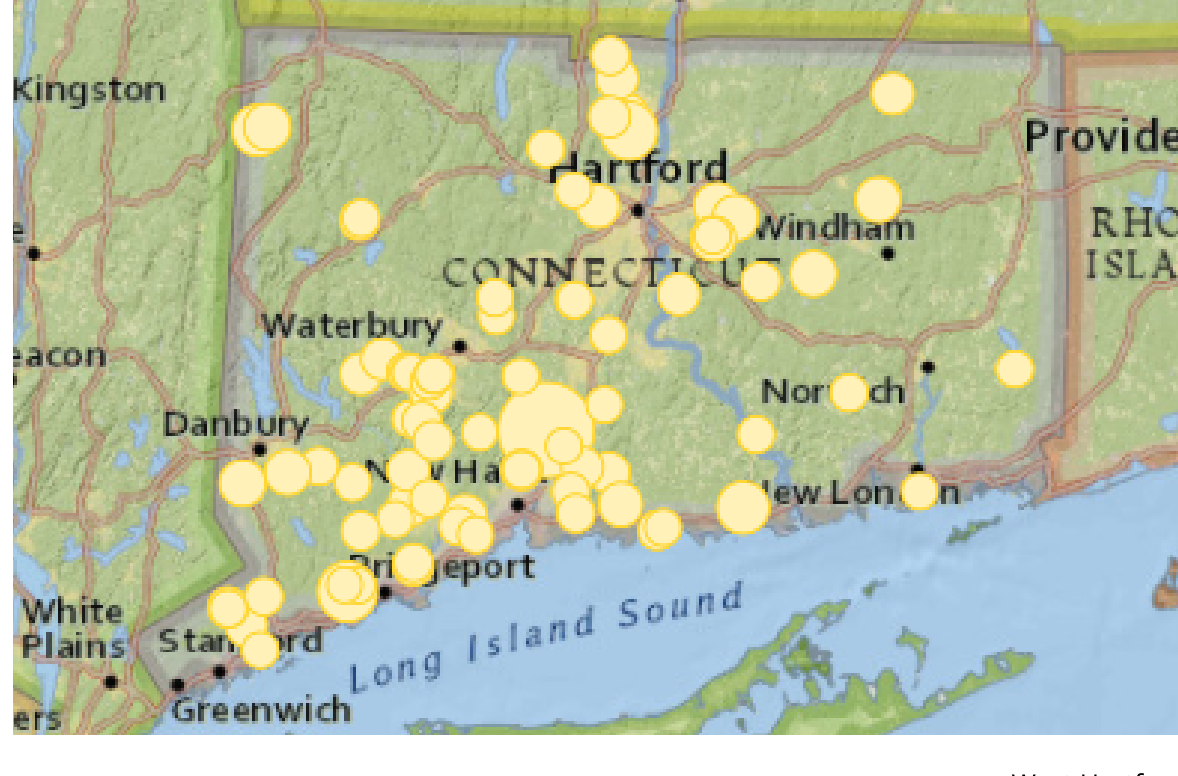

Curious about those late fall calls?

This post from Jim's *Beyond Your Backdoor* blog provides a little insight as to why we may hear some frog calls into the fall.

Frogs in the News

A new global assessment of the world's amphibians finds that more than 2 of every 5 known species is at risk of extinction. [Full article here](#)

Congratulations!

Each FrogWatcher averaged 14 observations for the season. Special shout out to Robert S. for making **153** observations in 2023!
